EJ

“ I had the privilege to work with Dave at Cal Poly with students of City and Transportation Planning during many years. His enthusiasm in presenting a highly sophisticated show about noise levels and distribution is unforgettable to dozens of students as well as his citizen's contribution to transportation planning along Santa Ysabel Avenue in Los Osos. He always welcomed classes in Los Osos to explain real life traffic planning and the importance of educated citizen input.

He often informed me about his work with Dubbing Associates in noise matters, especially in France, where he travelled a lot. I felt honored when he asked me some day to consider being on his board of directors.

Most of all Dave was not only a thorough professional but also an inspirational colleague with a good sense of humor. We miss him and will not forget him.

With our sincere condolences to the whole family we remain

Eugene Jud, Cal Poly CEENVE Department
Robert Bertini, University of South Florida, CUTR Department,
