“ Dad’s heart problems began when he contracted rheumatic fever as an 11 year old. At that time, the use of penicillin was restricted to members of the military; with sulfa drugs to wish he had an extreme reaction. his damaged mitral and aortic valves were replaced 25 years ago and served him well for more than two decades. Dad was warm hearted and a marvelous host. There are no words to describe how deeply he is missed. Maureen Lynch

Uncle Donnie and Aunt Joan were very kind to us when we drove to California a few years ago. They planned a wonderful lunch picnic at the park across from Hearst castle and a second time when they offered their guest room in their home for a night. Both Times were lots of fun. We will miss you too. Martha and Barney O’Reilly
