“ Ron has a special place in my memory as a guy that was always up for a good idea to add to the success of our central coast chapter of the American Truck Historical Society. He gladly opened his property for our group to marvel at his eclectic collection of historic equipment and vehicles, much of it rusting away to oblivion, but with stories about each prized acquisition from many years of collecting. He was very happy to share one of his latest toys, a 15 foot diameter cross-section of a redwood tree depicting historical dates along the tree rings. Definitely takes the prize for passing with the largest number of toys! He won hands down! Jim Trask
