“ I am saddened to hear of Sam's passing. He was a true gentleman and a great human being. I was a new inspector at the Energy Systems Group, in El Segundo, in the mid 1970's when Sam was Division President. We passed each other on the production floor one day and he went out of his way to meet me and make me feel welcome. I will never forget his gesture and how he treated people.

*Gabe Alexander

“ I remember Sam from both Rocketdyne and the B-1 divisions. I reuse a statement Sam made to a group of us when Rockwell was being dragged across the coals because of mischarges at another division. His advice was;

*"We make excellent products and make a good profit. We don't need a nickel we don't earn."*

*I always give him credit for the quote because he deserves it.*

*R. Arlyn Feight  
Fort Thomas, AZ*

“ *I knew Sam from when I worked at Fresno State. He was always caring and supportive. I had the privilege of helping him with all of his Fresno presentations that he gave regarding the B1B program.*

*He will be greatly missed and his death is a huge loss for all of us. I pray for God's grace and mercy during this time.*

*Gwen Burks*
